Subject Index of Volume B3

Acetylcholinesterase
immobilization of, on solid surfaces; chemistry and activity studies, 311
Additives
effects of thickness and, on thin-film SnO_2 gas sensors, 69
Ammonium
urea sensor based on, ISFET, 287
Antibodies
highly sensitive device for visual detection of antigens and, by means of light interference, 113
Antigens
highly sensitive device for visual detection of, and antibodies by means of light interference, 113

Bienzyme sensors
robust graphite-based, 227
Biosensor
concanavalin A-coated piezoelectric crystal, 295
Bismuth
Bi-doped Sn oxide thin-film gas sensors, 183

Catalytic activity
conductance, work function and, of SnO_2-based gas sensors, 205
Chemical sensitivity
of ISFET with Ta_2O_5 membrane in strong acid and alkaline solutions, 75
Chemical sensors and arrays
solubility interactions and design of chemically selective sorbent coatings for, 85
Combustion monitoring sensor
using Sn dioxide semiconductor, 247
Concanavalin A
-coated piezoelectric crystal biosensor, 295
Conductance
work function and catalytic activity of SnO_2-based gas sensors, 205
Conductive-oxide-gate FET
as gas sensor, 273
Contour imaging
two-dimensional, with fiber optic microbend tactile sensor array, 31
Copper
gas-sensing characteristics of ZnO and Cu-impregnated ZnO, 305
sensitivity to NO_2 of sandwich based on Pb phthalocyanine and Cu phthalocyanine, 255

2-(Diphenylacetyl)-1,3-indandione-1-hydrazone
sensing of polar molecules using solid-state fluorescence enhancement of, derivatives, 237

Electrode material
WO_3 as actuator, for ISFET-based coulometric sensor–actuator systems, 129
Electron-acceptor gases
effect of, on Pb oxide and Pb phthalocyanine thin films; comparative study, 157
Encapsulation aging
monitoring of ISFET, by impedance measurements, 43
Enzyme membrane
new glucose sensor using microporous, 215

FET
conductive-oxide-gate, as gas sensor, 273
Finite-element analysis
applied to extracellular microelectrode design, 23
Fluorescence enhancement
sensing of polar molecules using solid-state, of 2-(diphenylacetyl)-1,3-indandione-1-hydrazone derivatives, 237

Gas identification system
using plural sensors with characteristics of plasticity, 1
Gas sensing
introductory remarks on, 165
Gas-sensing characteristics
of ZnO and Cu-impregnated ZnO, 305
Gas sensitivity
grain size effects on, of porous SnO_2-based elements, 147
Gas sensor(s)
Bi-doped Sn oxide thin-film, 183
CH_4 thick-film; characterization method and theoretical explanation, 191
conductance, work function and catalytic activity of SnO_2-based, 205
conductive-oxide-gate FET as, 273
effects of thickness and additives on thin-film SnO_2, 69
kinetic model of thermally cycled Sn oxide gas sensor, 123
new trends and future prospects of thick- and thin-film, 167
selectivity studies on Sn oxide-based semiconductor, 7
sensitivity and selectivity of thin-film Sn oxide gas sensor, 197
signal-shape analysis of thermally cycled Sn-oxide, 63
thin films for, 175
Glucose sensor
new, using microporous enzyme membrane, 215
Grain size effects
on gas sensitivity of porous SnO_2-based elements, 147
Graphite
robust graphite-based bienzyme sensors, 227

Hydrogen sensor
how limited mass transfer in gas phase may affect steady-state response of Pd-MOS, 139

Elsevier Sequoia, Lausanne

Identification capability
improvement of, in odor-sensing system, 221
Immobilization
of acetylcholinesterase on solid surfaces; chemistry and activity studies, 311
Impedance measurements
monitoring of ISFET encapsulation aging by, 43
Impedance response
a.c., to K; Langmuir–Blodgett deposited valinomycin–phospholipid films on Pt, 51
ISFET
chemical sensitivity of, with Ta_2O_5 membrane in strong acid and alkaline solutions, 75
monitoring of, encapsulation aging, by impedance measurements, 43
time-dependent response characteristics of pH-sensitive, 279
urea sensor based on ammonium-ion-sensitive FET, 287
WO_3 as actuator electrode material for ISFET-based coulometric sensor–actuator systems, 129

Kinetic model
of thermally cycled Sn oxide gas sensor, 123

Langmuir–Blodgett
deposited valinomycin–phospholipid films on Pt; a.c. impedance response to K, 51
Lead
effect of electron-acceptor gases on Pb oxide and Pb phthalocyanine thin films; comparative study, 157
sensitivity to NO_2 of sandwich based on Pb phthalocyanine and Cu phthalocyanine, 255
Light interference
highly sensitive device for visual detection of antigens and antibodies by means of, 113

Mass transfer
how limited, in gas phase may affect steady-state response of Pd-MOS hydrogen sensor, 139
Methane
CH_4 thick-film gas sensors; characterization method and theoretical explanation, 191
Microelectrode design
finite-element analysis applied to extracellular, 23
MOS
how limited mass transfer in gas phase may affect steady-state response of Pd-MOS hydrogen sensor, 139

Nitrogen dioxide
sensitivity to, of sandwich based on Pb phthalocyanine and Cu phthalocyanine, 255

Odor-sensing system
improvement of identification capability in, 221
Optical method
improved, for surface plasmon resonance experiments, 261
Optical sensor
for on-line determination of solvent mixtures based on fluorescent solvent polarity probe, 267
Oxygen
development of solid electrolyte sensor for, in hot gases, 15

Palladium
how limited mass transfer in gas phase may affect steady-state response of Pd-MOS hydrogen sensor, 139
pH-sensitive ISFET
time-dependent response characteristics of, 279
Plasticity
gas identification system using plural sensors with characteristics of, 1
Platinum
Langmuir–Blodgett deposited valinomycin–phospholipid films on Pt; a.c. impedance response to K, 51
Plural sensors
gas identification system using, with characteristics of plasticity, 1
Polar molecules
sensing of, using solid-state fluorescence enhancement of 2-(diphenylacetyl)-1,3-indandione-1-hydrazone derivatives, 237
Potassium
Langmuir–Blodgett deposited valinomycin–phospholipid films on Pt; a.c. impedance response to K, 51

Response characteristics
time-dependent, of pH-sensitive ISFET, 279

Selectivity studies
on Sn oxide-based semiconductor gas sensors, 7
Sensitivity and selectivity
of thin-film Sn oxide gas sensor, 197
Sensor array
two-dimensional contour imaging with fiber optic microbend tactile, 31
Signal-shape analysis
of thermally cycled Sn-oxide gas sensor, 63
Solid electrolyte sensor
development of, for oxygen in hot gases, 15
Solubility interactions
and design of chemically selective sorbent coatings for chemical sensors and arrays, 85
Solvent mixtures
optical sensor for on-line determination of, based on fluorescent solvent polarity probe, 267
Solvent polarity probe
optical sensor for on-line determination of solvent mixtures based on fluorescent, 267
Sorbent coatings
solubility interactions and design of chemically sensitive, for chemical sensors and arrays, 85
Surface plasmon resonance experiments
improved optical method for, 261

Tantalum
chemical sensitivity of ISFET with Ta_2O_5 membrane in strong acid and alkaline solutions, 75
Tin dioxide semiconductor
combustion monitoring sensor using, 247

Tin oxide
Bi-doped Sn oxide thin-film gas sensors, 183
conductance, work function and catalytic activity of SnO_2-based gas sensors, 205
effects of thickness and additives on thin-film SnO_2 gas sensors, 69
grain size effects on gas sensitivity of porous SnO_2-based elements, 147
kinetic model of thermally cycled Sn oxide gas sensor, 123
selectivity studies on Sn oxide-based semiconductor gas sensors, 7
sensitivity and selectivity of thin-film Sn oxide gas sensor, 197
signal-shape analysis of thermally cycled Sn-oxide gas sensor, 63

Tungsten trioxide
WO_3 as actuator electrode material for ISFET-based coulometric sensor–actuator systems, 129

Urea sensor
based on ammonium ISFET, 287

Valinomycin–phospholipid films
Langmuir–Blodgett deposited, on Pt; a.c. impedance response to K, 51
Visual detection
highly sensitive device for, of antigens and antibodies by means of light interference, 113

Zinc
gas-sensing characteristics of ZnO and Cu-impregnated ZnO, 305
